|------------------------------------------------------------------------|---------------------------------------------|
| <b>Product Name :</b><br>Acetyl Salicylic Acid                         | <b>Product Code :</b><br>NECHEMICAL-L500708 |
|                                                                        |                                             |
| <b>Description :</b>                                                   |                                             |
| Acetyl Salicylic Acid                                                  |                                             |
| <b>Technical Specification :</b>                                       |                                             |
| Grade: Laboratory Reagent (LR)                                         |                                             |
| Molecular Formula: C <sub>9</sub> H <sub>8</sub> O <sub>4</sub>        |                                             |
| Molecular Weight: 180.16 g/mol                                         |                                             |
| Capacity: 250 gm                                                       |                                             |
| Appearance Form: Crystalline                                           |                                             |
| Colour: White                                                          |                                             |
| pH: 3.5 at 2.5 g/l at 20 °C                                            |                                             |
| Melting point/range: 134 - 136 °C - lit.                               |                                             |
| Synonyms: ASA, O-Acetyl salicylic acid, 2-Acetoxybenzoic acid, Aspirin |                                             |
