

Product Name :

Automotive Electronics Trainer for engineering schools

Product Code :

AUTO-EN052

**Description :**

Automotive Electronics Trainer, technical teaching equipment for engineering

This trainer provides a realistic simulation of an automotive engine control management system with real time results and modular panel layout. The system schematic panel shows the block diagram of an Engine Control Management (ECM), sensor and actuator components, & wiring connections complete with test points available for measurement by test lamps, multimeter and oscilloscope. Realistic troubleshooting exercises are provided with error answer feedback featuring electrical test points & interactive fault simulation.
