

Product Name :
Capping Set (Vertical) For Testing Lab for Concrete Testing Lab

Product Code :
NCOT-C20

Description :

Capping Set (Vertical) for Concrete Testing - For capping compression cylinder specimens. This apparatus can be used both in the laboratory and in the field. The specimens capped in this apparatus have plane parallel faces. For cylinders 150mm dia x 300mm long. Consists of a base with an upright. The upright serves as a guide for positioning the capping plate and cylinder. The 19mm thick capping plate is machined accurately. There is a recess in the plate for keeping the molten capping compound and to position cylinder. Complete with cylinder carrier and ladle.

Capping Set (Vertical) - For cylinder 100mm x 200mm long specification Same as above but for cylinders 100mm x 200mm long. For carrying the concrete cylinders in the laboratory and in the field. Double handles make it easy to hold the cylinder during capping operations. Complete with snap clamp and cushioning lining.
Capping mould : For capping the concrete cylinders, it consists of an accurately machined plate with a recess for 100mm dia specimen.
