

Product Name :

Compressed Air Braking System Panel, with Double Spring Brakes

Product Code :

TechnicalLab0462

Description :

Compressed Air Braking System Panel, with Double Spring Brakes

This trainer is a Turbo Star compressed air braking system with double spring braking unit and chuck drive. This unit is a wall mounted panel, is complete with all the connection circuits components for braking systems, and allows you to:

- Clearly describe and teach the running of modern braking systems currently required by law (service brake, parking brake, and emergency brake).
- Teach and differentiate the particular parts of the system with the aid of color-coded connection pipes to easily identify the various circuits.
- Educate about both the E.E.C. Standard double braking system as well as the hydro-pneumatic and the braking system with the olive pilot, which are generally used on different light vehicles.
