

Product Name :
Computer interface Module for Embedded System Trainers Teaching Labs

Product Code :
EMB-TR-12

Description :

Computer interface Module - Computer interface Module Computer Interface module is an extension module for Nvis Microcontroller development platforms. The module has been designed to have a clear understanding of how serial port and USB port interfaced devices are controlled and interfaced with Microcontroller. The MC03 is connected with Microcontroller unit and PC. The computer interface module is made in such a way that a student can understand the whole concepts of serial and USB port and also how they are interfaced with Microcontroller

RS 232 interface using Rx / Tx of MCU for uploading /downloading

FT232 interface & communicate with MCU serial to USB with computer

PC based programming

Expansion connectors for plug in with Microcontroller unit and prototyping area

Every pin is marked in order to make the learning easier

Input/output & test points provided on board

Exhaustive Learning Material
