

Product Name :
De-Morgan's Theorem Trainer for Electronics Teaching Labs

Product Code :
BEL-TR-37

Description :

De-Morgan's Theorem Trainer - De-Morgan's Theorem Trainer - The De-Morgan's Theorem Trainer NV6553 is an elite training system for the digital laboratories. It is useful in understanding the basic concept of De-Morgan's Theorem. This trainer describes both the De-Morgan's Theorem statements in two separate sections so it is very easy for students to understand both the statements separately. The training system is designed in such a way that for performing any experiment students have to connect the links by patch cords, so it is very helpful for students to learn step by step implementation of De- Morgan's Theorems. Attractive input and output sections are provided on trainer in such a manner so that multiple experiments can be performed simultaneously.

Exclusive and compact design

Easy explanation of both the

De-Morgan's theorem statements

+5V SMPS Adaptor provided with the trainer for power supply

Designed by considering all the safety standards

Provided with an extensive manual

A low cost training system
