

|                                                                                          |                                             |
|------------------------------------------------------------------------------------------|---------------------------------------------|
| <b>Product Name :</b><br>Dipotassium Hydrogen Orthophosphate                             | <b>Product Code :</b><br>NECHEMICAL-L602401 |
|                                                                                          |                                             |
| <b>Description :</b>                                                                     |                                             |
| Dipotassium Hydrogen Orthophosphate                                                      |                                             |
| <b>Technical Specification :</b>                                                         |                                             |
| Grade: LR (Anhydrous), AR, HPLC, Molecular Biology (MB)                                  |                                             |
| Assay: (Acidimetric) 98.0%                                                               |                                             |
| Molecular Formula: K <sub>2</sub> HPO <sub>4</sub>                                       |                                             |
| Molecular Weight: 174.18 g/mol                                                           |                                             |
| Capacity: 500 gm, 25 kg, 50 kg                                                           |                                             |
| Synonyms: Dipotassium hydrogenphosphate, Dipotassium phosphate, sec.-Potassium phosphate |                                             |
| Appearance Form: Granules                                                                |                                             |
| Colour: White                                                                            |                                             |
| pH: 8,7 - 9,3 at 50 g/l at 25 °C                                                         |                                             |
| Melting point: 340 °C                                                                    |                                             |
| Density: 2,300 g/cm <sup>3</sup>                                                         |                                             |
| Water Solubility: Soluble                                                                |                                             |
