

Product Name :
Electricity Lab Trainer for Electronics Teaching Labs

Product Code :
BEL-TR-02

Description :

Electricity Lab Trainer - Stand alone operation

Durable, Easy to use kit. Includes all the Basic Electrical fundamentals. Solderless connections. Complete set of coils and cores to understand the Basics of Electro magnetic induction and Transformers. Provided with a component box to perform all the experiments, CBT covering all the experiments & Learning material.

Electricity Lab Trainer - versatile Training System for the laboratory. It is designed such that all the basic electrical circuits can be tested. The experiments given with this Training system will develop clear understanding of series and parallel circuits, electromagnetic induction, coil behavior with AC and DC circuits, diode and transistor characteristics etc. This simple training system provides a strong platform for detailed studies in electricals and electronics.

Stand alone operation

Durable, Easy to use kit

Includes all the Basic Electrical fundamentals

Solderless connections

Complete set of coils and cores to understand the Basics of Electro magnetic induction and Transformers

Provided with a component box to perform all the experiments

CBT covering all the experiments
