

Product Name :
Frequency Modulation / Demodulation Trainer for Vocational Training
and Didactic Labs

Product Code :
ETKN-0019

Description :

Equipment for Education, Engineering and Vocational Training - Experimental Training Board has been designed specifically for the study of Frequency Modulation and Demodulation.

Technical Specification :

Practical experience on this board carries great educative value for Science and Engineering Students

OBJECT

- * To observe the effect of D.C. voltage on frequency of carrier waveform.
- * To frequency modulate the carrier with Audio signal, observe F.M. waveform on C.R.O. and measure its modulation index
- * To demodulate the F.M. signal and observe the output on C.R.O.
- * To plot the characteristics curve of the slope detector demodulating circuit.
