

Product Name :
Function Generator Trainer Setup for Vocational College Trainers
Teaching Labs

Product Code :
EVO-TR-02

Description :

Function Generator Trainer Setup – Function Generator Trainer Setup The "Function Generator Trainer is a versatile training kit for Electrical and Electronics Laboratories. It is designed to explain the fundamentals of Signal Generation. A Function Generator is a product that can produce various patterns of Voltage at a variety of Frequencies and Amplitudes. This Function Generator Trainer allows students to produce the different waveforms and to understand the concept of their generation.

A Low cost Trainer demonstrating all basic concepts of Function Generator

Exclusive Presentation and Easy illustration of each block

Designed considering all safety standards

Low sine wave distortion

Low Variation with temperature

Fault creation and troubleshooting

Onboard Frequency range display

Provided with elaborated operating manual
