

Product Name :
Hydrogen Gas Determinator For Testing Lab for Gas Chromatography
Lab

Product Code :
DETE-M001

Description :

Hydrogen Gas Determinator for Gas Chromatography - The analyzer is capable of the determination of Hydrogen Gas (H₂) in metals and alloys with great simplicity using latest technology and menu driven software. The operation of this Hydrogen Gas Determinator analyzer is simplified with the use of Touch Screen based control systems which make the programming of all functions of the determinator extremely simple. Detection of Hydrogen gas is done using a very high sensitivity Macro Thermal Conductivity Detector capable to detect from 0.1 ppm to 5000 ppm using a nominal sample size of 1 gram for Hydrogen.
