

Product Name :
IMPACT OF A JET

Product Code :
Workshop Lab - HBW0017

Description :

IMPACT OF A JET

Technical Specification :

The equipment consists of a removable clear acrylic cylinder. Water is supplied through a tube at the bottom of the cylinder and discharged vertically through a nozzle onto a target plate. Each plate maintains the same working distance from the nozzle.

e.

A clear acrylic guard is provided to prevent water jet from splashing on the target. Force on the plate pushes its stem upward.

Dead weight is then applied on the stem to counter balance the force exerted by the water jet. This balance is indicated by a pointer on a steel rod next to the weight. The apparatus rests on adjustable footings and a bull's eye level is provided.
