

**Product Name :**

Laboratory Microscopes Manufacturers for Teaching Equipments Lab

**Product Code :**

LABS-EDU-00157

**Description :**

**Laboratory Microscopes Manufacturers** A Optical Microscope is an instrument used to see objects that are too

small for the naked eye. The science of investigating small objects using such an instrument is called microscopy. Microscopic means invisible to the eye unless aided by a microscope. There are many types of microscopes, the most common and first to be invented is the optical microscope which uses light to image the sample. Other major types of microscopes are the electron microscope (both the transmission electron microscope and the scanning electron microscope) and the various types of scanning probe microscope
