|---------------------------------------------------------------------------|----------------------------------------------|
| <b>Product Name :</b><br>Mercurous Nitrate Dihydrate                      | <b>Product Code :</b><br>NECHEMICAL-L6019015 |
|                                                                           |                                              |
| <b>Description :</b>                                                      |                                              |
| Mercurous Nitrate Dihydrate                                               |                                              |
| <b>Technical Specification :</b>                                          |                                              |
| Grade: Laboratory Reagent (LR)                                            |                                              |
| Assay: (Oxidimetric) 95.0%                                                |                                              |
| Molecular Formula: $\text{Hg}_2(\text{NO}_3)_2 \cdot 2\text{H}_2\text{O}$ |                                              |
| Molecular Weight: 561.22 g/mol                                            |                                              |
| Capacity: 100 gm, 500 gm                                                  |                                              |
| Synonyms: Mercurous nitrate, Mercury (I) Nitrate                          |                                              |
| Appearance Form: White Crystalline                                        |                                              |
| Density: 4,78 g/cm <sup>3</sup>                                           |                                              |
| Melting Point: 70 °C                                                      |                                              |
