|--------------------------------------------------------------------|----------------------------------------------|
| <b>Product Name :</b><br>N-Phenyl Anthranilic Acid AR              | <b>Product Code :</b><br>NECHEMICAL-L3002030 |
|                                                                    |                                              |
| <b>Description :</b>                                               |                                              |
| N-Phenyl Anthranilic Acid AR                                       |                                              |
| <b>Technical Specification :</b>                                   |                                              |
| Grade: Analytical Reagents (AR)                                    |                                              |
| Assay: (Acidimetric) 98.0%                                         |                                              |
| Molecular Formula: C <sub>13</sub> H <sub>11</sub> NO <sub>2</sub> |                                              |
| Molecular Weight: 213.24                                           |                                              |
| Capacity: 25 gm, 100 gm                                            |                                              |
| Appearance: White to yellow to brown powder                        |                                              |
| Solubility: 33.3 mg soluble in 1 mL of methanol.                   |                                              |
