

Product Name :
Pavement Core Drilling Machine For Testing Lab for Bitumen Testing
Lab

Product Code :
NBTE-M17

Description :

The Pavement Core Drilling Machine for Bitumen Testing - Diesel engine powered road building drill has been designed specifically for the purpose of drilling test cores from or holes in, Roads, Airport Runways, Bridges etc. The Machine comprises of two vertical support columns, which carry the Drill head/Engine assembly with the help of screwed spindle. The 5 HP diesel engine with pulley mechanism works with minimum vibrations. The double precision bit advances with screwed spindle, which provides a constant, accurate drill pressure, minimum core chipping & long bit life. The complete assembly is supplied on a rigid metal base with leveling facility and is suitable for vertically down coring applications only.

Bit Diameter : Varying from 25mm to 150mm

Maximum depth of core : 700mm

Drill Speed : 475 & 800 R.P.M.

Guide Shafts : 50mm dia

Screwed Spindle : 20mm dia

Water Tap : 12mm

Drill Wrenches : Included

Water Tank : Optional
