

|                                                          |                                             |
|----------------------------------------------------------|---------------------------------------------|
| <b>Product Name :</b><br>Potassium Ferricyanide          | <b>Product Code :</b><br>NECHEMICAL-L602403 |
|                                                          |                                             |
| <b>Description :</b>                                     |                                             |
| Potassium Ferricyanide                                   |                                             |
| <b>Technical Specification :</b>                         |                                             |
| Grade: AR /ACS Reagents                                  |                                             |
| Assay: (iodometric) 99.0%                                |                                             |
| Molecular Formula: $K_3Fe(CN)_6$                         |                                             |
| Molecular Weight: 329.25 g/mol                           |                                             |
| Capacity: 500 gm                                         |                                             |
| Synonyms: Potassium hexacyanoferrate(III), Red prussiate |                                             |
| Appearance Form: Powder                                  |                                             |
| pH: 6,0 - 9 at 329 g/l at 25 °C                          |                                             |
| Density: 1,890 g/cm <sup>3</sup>                         |                                             |
