

Product Name :
Soxhlet Extraction Apparatus Mantle Type

Product Code :
NAAY-M61

Description :

Soxhlet Extraction Apparatus Mantle Type - Soxhlet Extraction Heater : Mantle Type With 3 Hot Plate OR With 6 Hot Hot Plates:

This apparatus is suitable to heat Soxhlet flasks. The heating element is attached to fiber glass yarn-knitted fabric to provide flexible support to bottom of the flask. Glass wool insulation is used below the elements in the housing which is phosphated and powder coated attractively. In the event of spillage the solvent will either evaporate or escape through the drainage hole below each element. The housing has two retort rods and a cross bar on which the extraction apparatus has a built-in regulator which controls the heaters. The heating elements have individual on/off switches and a pilot lamp to indicate working of the elements. The apparatus requires a 230 Volts AC single phase supply. Without glass parts and clamps.

Also:

Soxhlet Extraction Heater : Water Bath Type :

Double walled, inner stainless steel. The lid having 6 holes of 10 cm dia, provided with concentric rings and supplied with two straight rods and adjustable horizontal rod, electrically heated. Thermostatic control. Supplied without glass parts, clamps, boss heads.
