| <b>Description :</b><br>Spring Loaded Safety Valve, technical teaching equipment for engineering - Heat Transfer Training Systems and Heat Lab Engine Trainers                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |                                   |  |
| <b>Technical Specification :</b> <div><p><small>Loaded<br/>Safety Valve Model having two separate valves with one lever loaded by a spring. We are able to offer a superior quality range which are manufactured with best in class Steel and our materials. The Customization of our products are done as per the demands of customers with our highly grade workers and reliable engineers. Moreover, we make sure that the quality check is done with excellent testing and runs. Here is picture provided on site.</small></p><p><b>Features:</b></p><ul style="list-style-type: none"><li>● Efficient working</li><li>● Perfect fittings</li><li>● Smooth workings</li><li>● Handle extreme pressure</li><li>● Very Long Lasting</li></ul></div> |  |                                   |  |

Specifications

- Capable of working efficiently in tough conditions
- Resistant to corrosion and heat
- Low maintenance
- Superior quality steel used
- Easy to clean
