

Product Name : Transient Analysis of RC/RL Circuits for Electronics Teaching Labs	Product Code : BEL-TR-13
	
Description :	
Transient Analysis of RC/RL Circuits - Transient Analysis of RC/RL Circuits -Transient Analysis of RC/RL Circuits, NV6514 has been designed specifically for the Transient Response Analysis with both DC and AC signals as input. This is useful for students to study and analyze the behavior of any circuit during the transient period. The study of transient and steady state response of a circuit is very important as they form the building block of most electrical circuits. With this product, we can easily calculate time constant of RC and RL circuits theoretically and practically. Easy experimental illustration of Transient Analysis of RC and RL circuits Built-in +5 V DC Power Supply Built-in Signal Generator e-Manual Low cost
