|-------------------------------------------------------------------|---------------------------------------------|
| <b>Product Name :</b><br>Zinc Carbonate Basic                     | <b>Product Code :</b><br>NECHEMICAL-L603304 |
|                                                                   |                                             |
| <b>Description :</b>                                              |                                             |
| Zinc Carbonate Basic                                              |                                             |
| <b>Technical Specification :</b>                                  |                                             |
| Assay: 58.0%                                                      |                                             |
| Molecular Formula: $[\text{ZnCO}_3]_2 [\text{Zn}(\text{OH})_2]_3$ |                                             |
| Grade: Laboratory Reagent (LR)                                    |                                             |
| Molecular Weight: 549.02                                          |                                             |
| Synonyms: Zinc hydroxide carbonate                                |                                             |
| Appearance Form: Powder                                           |                                             |
| Colour: White                                                     |                                             |
| pH: 9.5 at 50 g/l at 20 °C                                        |                                             |
| Relative density: 3.500 g/cm <sup>3</sup>                         |                                             |
| Water solubility: insoluble                                       |                                             |
| Capacity: 500 gm, 25 kg, 50 kg                                    |                                             |
